I design and deploy **agentic and conversational AI solutions** end to end, from diagnosis to deployment, with voice agents built on ElevenLabs and Claude. In 2026 I founded **Sonelo**, which builds custom conversational AI role-play platforms, commerce agents, and agents that automate processes such as answering calls and booking appointments.

I studied **applied mathematics**. I'm a **Claude Certified Architect (Professional)** and take part in AI events and hackathons. I've lived in four countries: Mexico, Argentina, Spain and Canada.

STACK

Agents and voice

ElevenLabs Agents, Claude API, Claude Agent SDK, Claude Code, MCP, Agentforce, Vercel AI SDK

Quality

Evals, golden sets, LLM-as-judge, rubrics, human handoff

Build

TypeScript, Python, Next.js, Astro, React, Supabase, Vercel, Cloudflare

CERTIFICATIONS

Claude Certified Architect, Professional

EDUCATION

Applied Mathematics

ITAM · Mexico City

Psychology (bachelor's)

UNAM · in progress since 2024

LANGUAGES

Spanish native · English C2

Open to travel and relocation.

OUTSIDE WORK

Scuba diving instructor · chess (FIDE 1600) · photography · Roman history · poetry

SELECTED WORK

Voice sales trainer · Sonelo Trainer

- Sales role play against an AI buyer.
- **Claude scores every call** against a rubric: product, objections, closing and financing.
- Retail, real estate and automotive; timeshare in testing.

Voice shopping agent · for a dive operator

- Recommends trips based on the traveler's profile and **checks availability live**.
- Hands health and risk questions to the team.
- Evals for handoff, booking, availability and accuracy.

Voice and data for social organizations

- Voice assistant grounded in public information, tested against a **45-case golden set**.
- Platform that flags inconsistencies in financial files.
- AI-powered indicators platform for a foundation.

EXPERIENCE

Founder and Forward Deployed Engineer · Sonelo

Since 2026

Two lines: **Sonelo Trainer** (sales practice) and **Sonelo Solutions** (agents that answer calls, book appointments and handle reception). Every agent starts with a map of the calls it will handle and where they get stuck; its evals come from that map.

Global Real Estate Advisor · Los Cabos Sotheby's International Realty

Since 2024

Sold **7 of the 15 units** in a pre-construction development, from launch to delivery. Today I build voice agents for client follow-up, property information and team sales practice; I analyze data, build reports and create skills that automate processes.

Co-founder and Director · Datasphere

2023 to 2025

Software that tracked delivery platforms and gave about 10 restaurants in Madrid, Guadalajara and Mexico City price benchmarking and a monthly strategy. In the best case, **about 20% more sales** over 12 months (average of the last 2 months vs. the prior period). Absorbed by a delivery management company.

Business Strategy Analyst · Santgar

2021 to 2022

Technical and strategic side of a six-month **ERP implementation**: data migration, information structure and decision reports.

Stratego Management · Right Source

2017 to 2020

Workplace climate studies at plants in Toluca, Tijuana, Nogales and Monterrey, with groups of 20 to 100 people. Before that, I automated the formatting of thousands of documents a week with code: from a week of work to one or two days.
